

■ FULL STACK WEB DEV PLANNER

6-Month Week-by-Week Guide · Only Web Dev · Build Every Week

by **SYNTAX ERROR** | syntaxerrorr.com | [@code.abhii07](https://twitter.com/code.abhii07)

6	24	4–5 hrs	1
Months	Weeks	Daily	Project/Week

■ DAILY STUDY PLAN (4–5 hours)

2 hrs	2 hrs	1 hr
■ Learning	■ Coding	■ Project Build

■ STRICT RULES — FOLLOW THIS

■	No tutorial hopping — pick ONE resource and finish it
■	No copy-paste code — type every line, understand every word
■	Build every week — one mini project minimum, no excuses
■	Push code on GitHub — every single day, build that green graph

■ 6-MONTH OVERVIEW

M1	M2	M3	M4	M5	M6
HTML + CSS + Basic JS	Core JavaScript	React	Node + Express	Database + Full Stack	Advanced + Deployment

■ MONTH 1 — HTML + CSS + Basic JavaScript

Month 1	HTML + CSS + Basic JavaScript
Week 1	■ HTML Tags — headings, paragraphs, divs, spans ■ Semantic HTML — header, footer, nav, section, article ■ Forms — input types, labels, form validation attributes
Week 2	■ CSS Basics — colors, fonts, spacing, box model ■ Flexbox — justify-content, align-items, flex-wrap ■ Selectors — class, id, pseudo-class (:hover, :nth-child)
Week 3	■ CSS Grid — grid-template-columns, grid-area, auto-fit ■ Responsive Design — media queries, mobile-first approach ■ CSS Variables & transitions
Week 4	■ JavaScript — variables (let/const/var), data types ■ Functions — declaration, expression, arrow functions ■ Loops — for, while, forEach, map
■ BUILD ■ Portfolio Website ■ Responsive Landing Page ■ ...and more mini projects	

■ MONTH 2 — Core JavaScript (VERY IMPORTANT)

Month 2	Core JavaScript — The Most Important Month
Week 1	■ DOM Manipulation — querySelector, getElementById, innerHTML ■ Events — click, input, submit, keydown, event delegation ■ createElement, appendChild, removeChild
Week 2	■ ES6 — arrow functions, template literals, default params ■ Destructuring — arrays and objects ■ Spread / Rest operators, optional chaining
Week 3	■ Async JS — callbacks, Promises, .then().catch() ■ async / await syntax — cleaner asynchronous code ■ fetch API — GET requests, handling JSON responses
Week 4	■ Practice Week — revise all concepts from Weeks 1–3 ■ Build mini projects combining DOM + async JS ■ Error handling — try/catch, finally
■ BUILD ■ To-Do App ■ Calculator ■ Weather App (live API) ■ ...and more	

■ MONTH 3 — React (Frontend Framework)

Month 3	React — Frontend Framework
Week 1	■ React Basics — what is React, why use it ■ Components — functional components, JSX syntax ■ Rendering — conditional rendering, lists and keys
Week 2	■ Props — passing data between components ■ State — useState hook, state updates, re-rendering ■ Component communication — lifting state up
Week 3	■ useEffect — side effects, cleanup, dependency array ■ API Integration — fetch inside useEffect, loading states ■ Forms in React — controlled components, form handling
Week 4	■ React Router — BrowserRouter, Routes, Link, useNavigate ■ Full mini project combining all 3 weeks ■ Deploy to Vercel / Netlify
■ BUILD ■ Notes App (full CRUD) ■ Movie Search App ■ ...and more projects	

■ MONTH 4 — Backend (Node.js + Express)

Month 4	Backend — Node.js + Express
Week 1	■ Node.js Basics — event loop, modules (require/import), npm ■ Express Setup — creating server, listening on port ■ Basic routing — GET, POST, route parameters, query strings
Week 2	■ REST APIs — resource-based routing, HTTP methods ■ Request / Response — req.body, req.params, res.json ■ Postman — testing your APIs manually
Week 3	■ Middleware — custom middleware, express.json(), morgan ■ Error handling — global error handler, try/catch in routes ■ MVC structure — organise routes, controllers, models
Week 4	■ JWT Authentication — sign, verify, protected routes ■ bcrypt — hashing passwords before saving to DB ■ Login / Signup flow end to end
■ BUILD ■ Login / Signup API ■ Notes CRUD Backend ■ ...and more	

■ MONTH 5 — Database + Full Stack

Month 5	Database + Full Stack Integration
Week 1	■ MongoDB Basics — documents, collections, Atlas cloud setup ■ CRUD in MongoDB — insertOne, find, updateOne, deleteOne ■ MongoDB Compass — visual GUI for exploring your database
Week 2	■ Mongoose — connecting Node.js to MongoDB ■ Schema Design — define fields, types, validators ■ Models — creating, saving, querying documents via Mongoose
Week 3	■ Connect Frontend + Backend — CORS, proxy setup in React ■ Axios in React — POST login, GET data, handle responses ■ Auth flow — store JWT in localStorage, protect routes
Week 4	■ Full Project Build Week — integrate everything learned ■ Debug + test the full flow (React → Express → MongoDB) ■ Environment variables — .env files, never hardcode secrets
■ BUILD ■ Full Stack Auth System (React + Node + MongoDB) ■ Full CRUD App ■ ...and more	

■ MONTH 6 — Advanced + Deployment

Month 6	Advanced Concepts + Deployment
Week 1	■ Advanced React — Context API (global state without Redux) ■ useContext hook — creating and consuming context ■ Custom hooks — extracting reusable logic
Week 2	■ Backend Security — rate limiting, input sanitisation, helmet.js ■ Advanced error handling — centralised error middleware ■ Pagination, filtering, sorting in REST APIs
Week 3	■ Frontend Deployment — Vercel (React apps, instant deploys) ■ Backend Deployment — Render (Node.js, free tier) ■ Database — MongoDB Atlas (cloud DB, connect to deployed app)
Week 4	■ Final polishing — code cleanup, README, screenshots ■ GitHub profile — pin projects, write good descriptions ■ Resume + LinkedIn — add live project links
■ BUILD ■ E-commerce App (basic — cart + auth) ■ Blog / Notes Full Stack App ■ ...final capstone	

■ PROJECT MILESTONE TRACKER

Month	Projects to Ship
Month 1	Portfolio Website, Responsive Landing Page
Month 2	To-Do App, Calculator, Weather App
Month 3	Notes App (CRUD), Movie Search App
Month 4	Login/Signup API, Notes CRUD Backend
Month 5	Full Stack Auth App, Full CRUD App
Month 6	E-commerce App, Blog / Notes Full Stack

■ RESOURCES — Everything You Need to Become a Full Stack Dev

■ DOCUMENTATION & REFERENCE

■ MDN Web Docs	developer.mozilla.org/en-US/	The #1 reference for HTML, CSS, JavaScript — bookmark this, use it every day
■ W3Schools	w3schools.com	Beginner-friendly quick reference with live code examples for all web tech
■ Syntax Error	syntaxerrrr.com	Our website — notes, one-shot videos, DSA + web dev placement resources

■ YOUTUBE RESOURCES

■ JS + REACT + NODE	Web Dev Simplified by Kyle Cook youtube.com/@WebDevSimplified Best channel for JS, React, Node explained simply. Perfect for every month of this roadmap — clear, project-based teaching style.
■ FULL FREE COURSES	freeCodeCamp by freeCodeCamp.org youtube.com/@freecodecamp Full-length FREE courses on HTML, CSS, JS, React, Node and more. Best for structured in-depth learning of any web technology.
■ HINDI TUTORIALS	Code With Harry by Code With Harry youtube.com/@CodeWithHarry Hindi-medium tutorials covering the full web dev stack. Great for Indian learners — structured series from basics to full stack.
